

Manage the patient who interrupts DS-TB treatment

- Look for explanation for treatment interruption and give enhanced adherence support → 96. If alcohol/drug use → 142, stress → 86 or treatment side effects → 97.
- Manage according to duration of interruption:

TB tests changing from 'Xpert Ultra' to 'TB NAAT'
(NAAT = nucleic acid amplification test and includes Xpert as well as newer TB tests).

Once TB treatment complete, decide on treatment outcome
